

## Just What I Need

You came, when I, was so low I really  
Didn't, think I'd, last another day  
But you, took me, out of my depression  
And showed me a much better way

Loving you is where I wanna be  
The best thing that ever happened to me  
Was when she left and made room for you  
Oh its plain to see  
You're just what I need

It's not, that you're, just a substitution  
Cause no one, has ever  
Made me feel this good  
But if, I had, never hit the bottom  
Then I'd never know that you could

Loving you is where I wanna be  
The best thing that ever happened to me  
Was when she left and made room for you  
Oh its plain to see  
You're just what I

Need to be strong  
What I need to get by  
What I need here beside me  
'Til the day that I die

Loving you is where I wanna be  
The best thing that ever happened to me  
Was when she left and made room for you  
Oh its plain to see  
You're just what I ...

You're just what I need
